

## Thickeners for aqueous dispersions

## Abstract

5

An aqueous formulation of a polymer comprises an addition copolymer of

- e) from 30 to 79.5% by weight of N-vinylpyrrolidone
- 10 f) from 20 to 69.5% by weight of vinyl acetate
- g) from 0.5 to 25% by weight of a monovinyl ester of a C<sub>4</sub> to C<sub>20</sub> monocarboxylic acid
- h) from 0 to 40% by weight of a further, copolymerizable, ethylenically unsaturated compound.
